THE CHALLENGE

Your sustainability pledge was no simple undertaking.

As consumers grow more eco-conscious, retail leaders like you have risen to meet the shift with a pledge to design out plastic pollution by 2025.

Wax and cardboard crates degrade quickly. Reusable crates have become costly and logistically challenging. The industry needed something better.

THE STATUS QUO IS BROKEN

Wax & Cardboard

Degrades rapidly in moisture. Cross-contamination risk. Non-recyclable at end of life.

Reusable Crates

Costly return logistics. Sanitation liability. High replacement rate. Carbon footprint of returns.

Wood Crates

Heavy (4.2 lbs vs 1.47 lbs). Prone to mold, rusted wires, wood fragments. No recyclability.

WE'VE MADE ECO-FRIENDLY THE SMARTER WAY TO DO BUSINESS

Providing superior produce protection from farm to retail shelf while meeting the strictest sustainability requirements.

1

SEALS IN FRESHNESS

Farm-fresh quality locked in from harvest to retail. No moisture escape, no contamination.

2

ULTRA LIGHTWEIGHT

At just 1.47 lbs, pack more per truckload and cut fuel costs every single run.

3

100% DURABLE

Sturdier than traditional wax packaging. Holds up in coolers, loading docks, and transit.

4

MOISTURE-PROOF

100% waterproof design eliminates wax residue, bacterial buildup, and product loss.

WHO WE ARE

Made of durable, recycled, corrugated plastic, each Plastpac product has been developed to protect produce at every stage of storage and transport, while exceeding sustainability requirements.

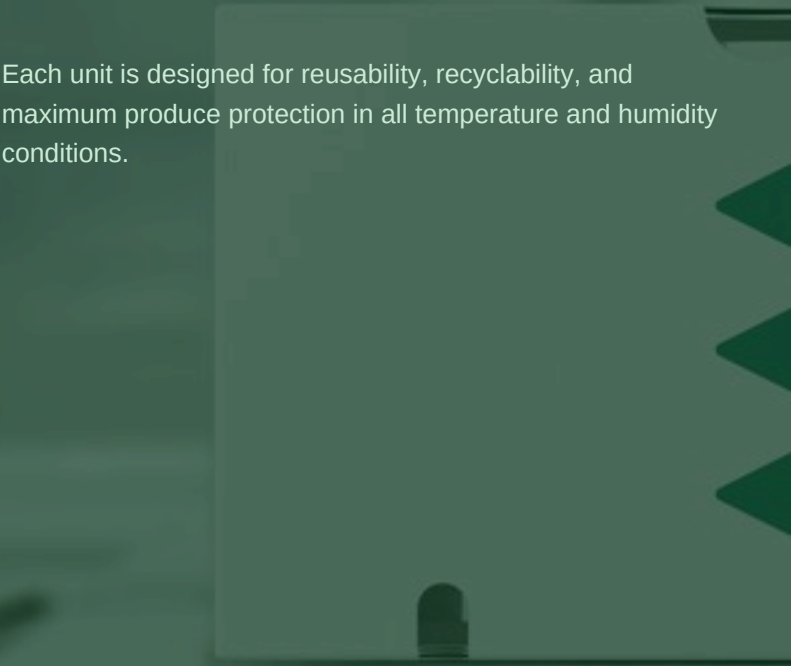

THE MARKET DEMAND IS NOW

of companies have openly committed to sustainable packaging goals

of buyers are more likely to choose suppliers with sustainable packaging

As the world grows more eco-conscious, demand for sustainable packaging is rising rapidly.

THE ECOCRATE DIFFERENCE

Each unit is designed for reusability, recyclability, and maximum produce protection in all temperature and humidity conditions.

Plastpac enables a seamless transition to closed-loop recycling ? eliminating end-of-life plastic waste.

LINEAR (OLD WAY)

Extract & Produce

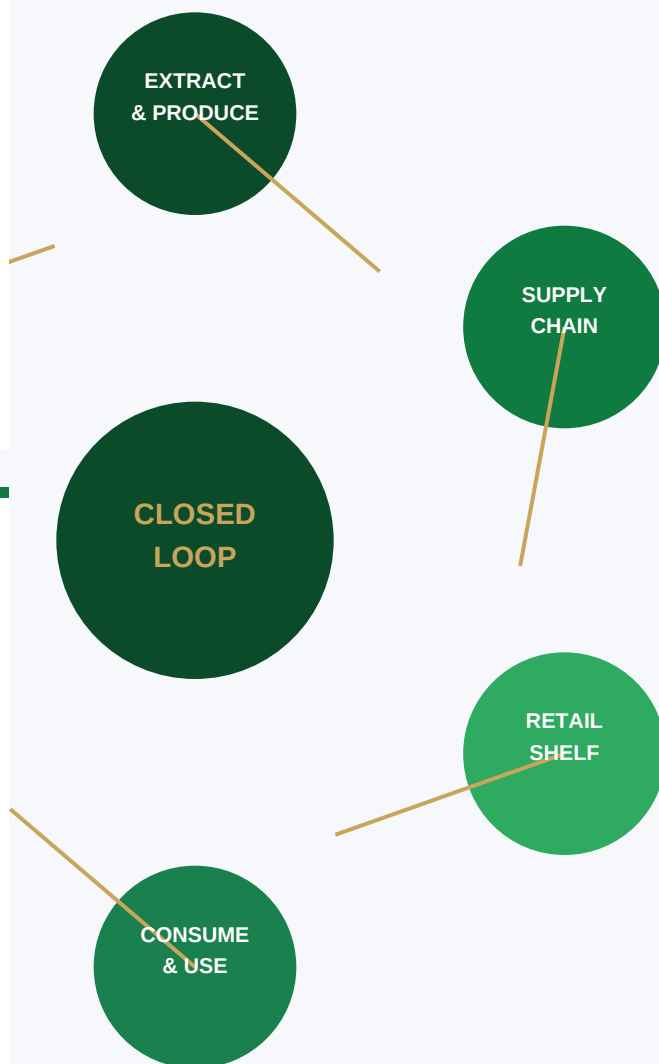

Supply & Consume

Dispose to Landfill

Repeat ? no recovery

CLOSED LOOP (PLASTPAC)

- Collect used packaging
- Process & recycle plastic
- Manufacture new EcoCrates
- Zero landfill commitment

COMPETITIVE ANALYSIS

	WOOD	RPC	WAX	ECOCRATE
Weight	4.2 lbs	2.35 lbs	2.71 lbs	1.47 lbs
Hygienic	Mold / Rust	Contamination	Wax Residue	100% Clean
Recyclable	Non-recyclable	High cost	Non-recyclable	100% Recyclable
Moisture Proof	No	Partial	No	Yes
Reusable	Limited	Yes (costly)	No	Yes
Sustainability	Low	Medium	Low	Highest

PRODUCT LINEUP

From field to fork, our full product ecosystem is engineered for superior protection, sustainability, and efficiency.

EcoCrates

The flagship. Completely water-resistant and impervious to heat and moisture. Reduces bacterial contamination and offers better product protection than any other packing alternative. Reusable, recyclable, built to last.

EcoPallets

Made from thick, durable recycled plastic. Holds up to all the stacking and strapping you can throw at them. Dramatically lighter than wood with superior moisture resistance.

EcoSheets

Developed to hold up to all conditions while keeping your product perfectly separated and protected throughout the cold chain. Engineered to outperform cardboard and foam alternatives.

REAL RESULTS

From aquaculture to poultry, EcoCrate is delivering real results for forward-thinking operators.

AQUACULTURE

Customer 622 | Shellfish

Tested EcoCrates with a pilot shipment of lobster across the Atlantic. Upon arrival, the customer was shocked by the quality preservation ? no moisture loss, zero contamination. Immediately converted entire operation.

Zero contamination

Atlantic shipping test

Full conversion

POULTRY

Customer 112 | Organic Chicken

Sought an alternative to both wax and reusable crates. Required a solution that held up to moisture and protected product during transport. EcoCrate exceeded every requirement on the first run.

Moisture-proof validated

Replaced wax & RPC

First-run success

WHY OPERATORS CHOOSE ECOCRATE

Superior Protection

No wax residue, no sawdust fragments, no mold. Just clean, protected produce.

Lighter Loads

1.47 lbs vs 4.2 lbs wood. More units per truck, lower freight costs on every load.

True Recyclability

100% recyclable at end of life. No landfill. Meets every retailer ESG requirement.

Cold Chain Ready

Impervious to moisture and temperature swings from cooler to dock to delivery.
