ROLE

Marketing arm and import-export
middleman

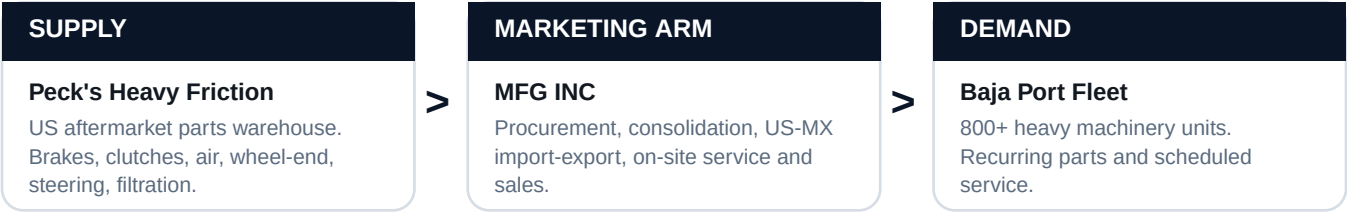

Executive Summary

Mexausa Food Group, Inc. (MFG INC) acts as the dedicated marketing arm and cross-border procurement middleman for the heavy-machinery fleet supporting the new Pacific port under development in Baja California, Mexico. MFG INC sources heavy-duty truck, trailer, and equipment parts from Peck's Heavy Friction (PHF), a full-service California aftermarket parts warehouse distributor, then imports and delivers those parts into Mexico to keep the project fleet running and to supply on-site service and sales.

The port build is projected to require more than 800 pieces of heavy machinery across earthmoving, hauling, lifting, and concrete operations. Every unit is a recurring consumer of friction, air-brake, wheel-end, clutch, filtration, and hydraulic components. MFG INC consolidates that demand into a single sourcing, import, and service channel: one supplier relationship on the US side, one delivery and service program on the Mexico side.

The Baja Pacific port program aligns with the Punta Colonet / Bahia Colonet development in the municipality of Ensenada, whose integral port administration concession was granted in late 2025 and which is being revived through nearshoring and Asian manufacturing investment. Figures in this brief are MFG INC planning estimates for the parts-and-service scope and are not official project procurement totals.

The Supply Chain

Projected Heavy Machinery Fleet

MFG INC planning estimate of the equipment population generating recurring parts and service demand across the build.

Equipment Class	Units
Haul and dump trucks (rigid and articulated)	180
Hydraulic excavators (crawler and wheeled)	120
Wheel loaders	90
Crawler dozers	70
Concrete mixer trucks	60
Compactors and rollers	55
Cranes (crawler, mobile, port handling)	45
Motor graders	40
Backhoe loaders	40
Water and fuel tanker trucks	35
Telehandlers and rough-terrain forklifts	30
Service and mechanic trucks	25
Pile-driving and drilling rigs	20
Total projected units	810+

Supplier Line Card (Sourced Through PHF)

Brand and manufacturer lines MFG INC procures for the fleet program. Categories reflect a full heavy-duty truck and trailer parts house. Supplier locations and direct contact details are intentionally omitted; MFG INC is the single point of contact.

Brakes and Friction

Bendix, Meritor, Euclid, Gunite, Webb Wheel, Dayton Parts, Marathon, Fras-le

Air Brake and ABS

Bendix, WABCO, Haldex, TSE Brakes, MGM Brakes, Sealco, Tramec, Velvac

Clutches and Driveline

Eaton, Sachs, Meritor, Illinois Auto Truck, Spicer

Wheel-End, Bearings, Seals

Stemco, SKF, Timken, ConMet, Chicago Rawhide

Steering and Hydraulics

BAB Steering Hydraulics, TRW, Sheppard, ZF

Suspension

Hendrickson, SAF-Holland, Ridewell, Reyco Granning

Trailer and Coupling

SAF-Holland, Jost, Fontaine, Holland, Hutchens

Electrical and Lighting

Phillips Industries, Grote, Truck-Lite, Optronics, Peterson

Filtration

Fleetguard, Donaldson, Baldwin, WIX, Luber-finer

Seating and Cab

National Seating, Bostrom, Sears Seating

Hardware and Accessories

Buyers Products, Tectran, Phillips, assorted OEM hardware

■ Cross-Border Service and Sales Model

01 Source

MFG INC orders heavy-duty parts from PHF against fleet demand and scheduled maintenance forecasts.

02 Consolidate

Orders are consolidated by category and staged for cross-border movement, with documentation prepared for import.

03 Import to Mexico

Parts are exported from the US and imported into Baja California under MFG INC as importer of record and trade coordinator.

04 Service and Sell

MFG INC supplies parts on-site and enables service on the port fleet, plus direct parts sales to contractors on the project.

■ Value MFG INC Delivers

- Single sourcing channel: one supplier relationship replaces dozens of fragmented part orders.
- Cross-border capability: US procurement paired with Mexico import, delivery, and service.
- Fleet uptime: friction, air, wheel-end, and filtration stocked against scheduled service cycles.
- Bilingual coordination and documentation across both sides of the border.
